Leica Cyclone REGISTER 360
The power of Cyclone, simplified

Speed

Drag, Drop, Done. From project creation to final reporting, project completion is significantly faster thanks to multi-threaded batch routines, one-step import and processing, guided workflows, built-in QA/QC tools and automated reporting. Cyclone REGISTER 360 saves significant time and guess work while delivering higher productivity.

Scale

Cyclone REGISTER 360 handles even the most challenging of projects with ease and takes the headache out of complex workflows. New users can execute large projects, scaling to your needs, thanks to the simple-yet-powerful interface. Customise settings to suit your working style and speed projects to conclusion.

Simplicity

Deliver professional-level project deliverables with ease. Cyclone REGISTER 360 provides guided registration workflows to assist new users and speed the process for experienced users. Intuitive QA tools and reporting take the guesswork out of your registration quality and put all the information you need at your fingertips. Batch export your final products to a range of formats and programs and even push live data to the cloud for global collaboration with the click of a button.

Leica Cyclone REGISTER 360
Feature highlights

IMPORT

Simplified import	In one simple process, scans are imported, targets are harvested, noise is filtered, thumbnails of scans and targets are created, a fully indexed database is created and registration is optimised via cloud feature mapping.
Improved import speed	Up to 20 x speed improvement of processing and import of scan and image data.
Drag and Drop	Scan and image data can be dragged and dropped into the program. No confusing import settings.

STANDARD SUPPORTED FILE FORMATS

Import project data collected by Leica Geosystems sensors	Full support of projects from ScanStation C and P-Series, BLK360 via WiFi import or BLK360 Data Manager.
Data import	e57, fls, frp, fws, ptg, ptx, zfc, zfprj, zfs.
Batch import and auto-align images	BLK360 HDR imagery, iSTAR, Nodal Ninja, Spheron.
Built-in SiteMap feature	Simply enter an address to quickly grab a site map to overlay your data on for use with SmartAlign and/or in the final registration report.

REGISTRATION AND VISUALISATION

Auto-Alignment	Auto-Alignment of scans for target and targetless workflows.
Visual Alignment	Quickly visually align scan set ups for cloud-to-cloud registration.
Auto bundle generation	Upon import, bundles will be formed automatically.
Auto extraction and pattern matching of black & white targets	Upon import, black & white target vertices are extracted and used for bundle formation.
Target Registration	Fully supports target registration (black & white and sphere).
SiteMap	New Sitemap object for placing scan positions on real world images or user imported images.
SmartAlign	Helps improve speed and accuracy of the auto-alignment process by allowing the user to visually identify links between setups pre-import.
Smart Error Matrix	Intuitive, visual error matrix auto populates depending on your link or bundle selection. Acceptable error limits can be set by user.
Measurement and Asset creation	Take measurements within the point cloud. Save assets to be included within your final registration report.
Error Panel	Simple aggregation of error reporting in one location to easily QC your registration. Error allowances can be set by the user per project specs.
Registration Version Manager	Version Manager allows you to easily save states of registration, track changes and review history.
World map for SiteMap creation	World map available for use inside the software for Sitemap creation.
Guided workflow	Guided workflows for all users levels with a user-friendly interface.
Localised	Localised in French, German, Italian, Spanish, Simplified Chinese, Japanese and Russian.
Link object	Link object provides colour coded view of the quality of your registration network.
Assistant panel	Quickly find help for the most common workflows.

PUBLISHING & PROFESSIONAL REPORTING

Visual Registration Report	Auto-generate a professional registration report as a deliverable pdf once registration is QC'ed.
Quality Matrix	Show registration quality in a new visual way to convey accuracy.
Intuitive error reporting	Colour-coded links and overall mean error based on user-designated thresholds per project needs.
Batch publish with a few clicks	Push data directly to the cloud (TruView Cloud).
	TruView Enterprise, TruView Cloud, JetStream Enterprise, E57, PTX, PTG, PTS, Professional registration report.
User-selected report graphics	Easily generate important image assets and publish them within your auto generated report.
Interoperability with Cyclone	Move your active registration between all Cyclone modules to take advantage of the speed and simplicity of Cyclone REGISTER 360 or advanced, industry-leading capabilities of Cyclone REGISTER.

COMPATABILITY

Cyclone, JetStream, TruView Cloud	Leica Cyclone 9.2 and newer, BLK360 Data Manager, Leica JetStream 1.3.2 and newer, Leica TruView Cloud 3.0 and newer.
